COWBOY GLOBAL EXPRESS

Company Overview

Cowboy Global Express (CGE) is a mission-focused logistics and transportation provider supporting aerospace, defense, and other mission-critical industries. Built to operate in complex, time-sensitive, and compliance-driven environments, CGE delivers disciplined execution across domestic and international supply chains.

CGE serves as the logistics execution arm of Cowboy Aerospace, extending deep aerospace and defense industry knowledge into real-world transportation and logistics operations. With over twenty years of combined experience, our team supports defense-aligned logistics environments, U.S. military service branches, and aerospace OEM supply chains.

CGE is a veteran and minority owned company, operating with a mission-first mindset and a commitment to accountability, visibility, and executional excellence.

Core Capabilities – Logistics & Transportation Execution

Transportation & Freight Coordination

Domestic and international ground and air transportation supporting aerospace, defense, and industrial programs. Capabilities include full truckload (FTL), less-than-truckload (LTL), expedited, and air freight solutions aligned to production schedules, sustainment needs, and program delivery timelines.

Third-Party & Fourth-Party Logistics (3PL / 4PL)

End-to-end logistics execution as a 3PL and 4PL provider, managing carrier selection, routing, scheduling, and shipment oversight through established partner networks. Services emphasize coordination, visibility, and accountability across complex, multi-stakeholder supply chains.

International & Multimodal Logistics

Global logistics management across air, ocean, inland waterway, and ground modes. Capabilities include multimodal transportation, port-to-door execution, coordination with cargo airlines and charter operators, ocean and barge carriers, drayage providers, international final-mile delivery, and supporting warehousing, cross-dock, and transload operations.

Freight Forwarding, Distribution & Export Support

Freight forwarding and distribution support for domestic and international movements, executed with awareness of ITAR, EAR, and export-controlled material requirements to align logistics execution with customer compliance obligations.

Program & Operational Logistics Support

Logistics services aligned to program requirements, operational tempo, and regulatory considerations common to aerospace and defense environments, supporting continuity across production, sustainment, and program-driven logistics operations.

Industry Experience & Operating Environments

- Defense-aligned logistics environments
- U.S. military service branches
- Aerospace OEM and Tier 1 / Tier 2 supply chains
- Mission-critical and high-compliance transportation programs
- Complex global routing and regulatory environments
- High-pressure, time-sensitive logistics operations

Certifications & Compliance

- ITAR-aware logistics execution
- Export compliance and documentation support
- Secure handling of sensitive and regulated cargo
- Adherence to customer, regulatory, and contractual requirements

CORPORATE INFORMATION

Company Name: Cowboy Global Express (CGE)

Relationship: Logistics execution arm of Cowboy Aerospace

Ownership: Veteran and Minority Owned

COWBOY GLOBAL EXPRESS

Differentiators – What Sets Cowboy Global Express Apart

- **Clear Communication & Shipment Visibility**
  Cowboy Global Express treats communication as a core operational function, providing proactive updates, direct access to experienced logistics personnel, and real-time shipment visibility from pickup through final delivery to support accountability and informed decision-making.
- **Complex, Regulated & Project Freight Capability**
  Cowboy Global Express supports hazardous, oversized, and non-standard freight associated with aerospace and defense programs, including coordination of route surveys, escorts, permitting, and project-based transportation to ensure compliant, uninterrupted movement.
- **Global Logistics & Export Control Awareness**
  International logistics execution is managed with disciplined attention to documentation, customs coordination, and cross-border requirements. Cowboy Global Express operates with awareness of ITAR, EAR, and export-controlled materials and supports customer compliance throughout the shipment lifecycle, including onboard courier solutions for sensitive or time-critical movements.
- **Defense-Aligned Logistics Execution**
  Cowboy Global Express operates within defense and government-adjacent logistics environments, with experience supporting transportation activities aligned to U.S. Department of Defense frameworks and the operational and regulatory requirements common to aerospace and military programs.
- **Material Handling & Site-Level Execution**
  Cowboy Global Express coordinates site-level logistics and material handling, including cranes, forklifts, packaging partners, drayage providers, and specialized vendors required for secure loading, unloading, staging, and transfer of complex freight.

Past Performance & Experience

- Over 20 years of combined experience supporting logistics and transportation operations within U.S. Department of Defense-aligned environments, including work supporting military service branches and Tier-1 aerospace and defense prime contractor supply chains.
- Coordinated freight movements aligned with Department of Defense transportation frameworks, including shipments executed under Surface Deployment and Distribution Command (SDDC) governance, supporting unit movements, sustainment activities, and program-driven transportation requirements.
- Provided logistics support for major defense production and sustainment programs, including movement of hazardous, oversized, and non-standard freight associated with aerospace and defense platforms.
- Executed complex project and unit-move logistics, coordinating route surveys, state and municipal permitting, escorts, police escorts, and specialized handling requirements to ensure compliant, uninterrupted transportation.
- Managed site-level material handling and loading/unloading operations through coordination with crane providers, forklift operators, packaging partners, drayage providers, and other specialized service vendors.
- Coordinated domestic and international transportation across air, ocean, inland waterway, and ground modes, executed with awareness of ITAR, EAR, and customer export compliance obligations.
- Supported cross-border and multi-leg shipment workflows requiring disciplined documentation management, customs coordination, and continuity across ports, terminals, and final delivery locations.
- Operated within high-accountability defense logistics environments, emphasizing proactive communication, shipment visibility, traceability, and on-time execution throughout the transportation lifecycle.
